

HURD LIBRARY SUBJECT INDEX

This is a very basic index to the subjects contained in the Hurd Library, designed to help users, visitors and library stewards. Members of visiting groups often ask whether we have a book on a particular subject. It omits most of Theology, since works on this subject can be found quite easily, and the object is to show the enormous range of other subjects represented. References are to authors and the books can be found by consulting the two-volume typed catalogue. A good many of the books, particularly those on Law, are in Latin, but the more popular topics are well represented in English.
